GATI

Brand guidelines

ब्रान्ड निर्देशिका

सही सूचना, सही समयमा ।

The right alert, right on time.

Version 1.0 · November 2026 · nirajbhusal.github.io/gati-alerts

What Gati is

Gati is an independent citizen project that relays Nepal's official disaster alerts, with source and time. It is Nepali first, free, open source, and needs no account.

> **Gati never issues official warnings.** It carries the words of agencies such as DHM, NDRRMA and NEOC to more people, faster. Everything in this guide follows from that: the brand should look calm, clear and trustworthy, and should never look like a government body.

Name

गति

The name. It means speed, motion: the right information should arrive fast.

Gati

In English, capital G only. Never “GATI” in running text. Together, Nepali comes first: **गति Gati**.

Tagline

सही सूचना, सही समयमा ।

The right alert, right on time.

Short description

“नेपालका आधिकारिक विपद् सूचना, स्रोत र समयसहित, फैलाउने स्वतन्त्र नागरिक परियोजना।”

“An independent citizen project that relays Nepal's official disaster alerts, with source and time.”

How to credit an alert

Never write “Gati warned”. Write “DHM's warning, relayed by Gati”.

Recognition

Gati was featured in GitHub's Octoverse 2026 report (28 October 2026). Say “Featured in GitHub Octoverse 2026”. It is a mention, not an award or an endorsement, and Gati is not affiliated with GitHub.

Logo

The mark is a white “ग”, the first letter of गति, on a red rounded square, with three signal arcs spreading to the right. The arcs stand for a message being relayed, and fade as they travel.

Horizontal logo. First choice on light backgrounds.

Horizontal logo, white. For dark backgrounds.

Mark

Stacked

One colour

One colour, white

Clear space

Keep at least a quarter of the mark's height empty on every side. Nothing else goes inside that space: no text, no other logo, no edge of the page.

Minimum size

VERSION	SCREEN	PRINT
Mark	24 px	8 mm
Horizontal logo	96 px wide	28 mm wide
Stacked logo	64 px wide	18 mm wide

Below these sizes use the mark alone. At 32 px and below (favicon) the letter appears without the arcs.

Colour

Brand colours

Gati Red	Navy	Crimson	River Teal	Glacier
#E2362B	#0B1424	#DC143C	#0F7C86	#7FD1D8
Logo, app icon	Wordmark, dark surfaces	Interface accent	Links, secondary accent	Links on dark

Neutrals

Snow	Mist	Slate	Ink
#F7F9FB	#D5DEE7	#4A5A6A	#14202B
Page background	Borders, dividers	Secondary text	Body text

Severity colours (CAP)

Extreme	Severe	Moderate	Minor	Info
#8E1B14	#D93025	#F28C1E	#F2C94C	#8F9BB3
अत्यन्त गम्भीर	गम्भीर	मध्यम	सामान्य	सूचना

> Severity colours are reserved for alert severity. Never use them as decoration, and always show them with a word and an icon, so the meaning does not depend on colour alone.

Using colour

- Most of any layout is neutral: Snow or white with Ink text, or Navy with white text.
- Gati Red belongs to the logo. Use it sparingly elsewhere, so it is never mistaken for a Severe alert.
- Body text must reach a contrast of 4.5:1 against its background.
- The site has three themes (paper, light, dark). The paper theme uses a very light warm background, `#FCF6F4`.

Typography

अ आ क ख ग

Mukta

Devanagari text and headings. Weights 400, 600 and 700.

नेपालका आधिकारिक विपद् सूचना, स्रोत र समयसहित।

Aa Bb 0123

Inter

Latin text and numerals. Weights 400, 500, 600 and 700.

Nepal's official disaster alerts, with source and time.

Both are open fonts under the SIL Open Font License and are served from the Gati site itself, never from a third party.

Scale

ROLE	SIZE	WEIGHT	NOTES
Page title	28 to 32 px	700	One per page
Section heading	20 to 22 px	700	
Alert headline	18 to 20 px	600 to 700	The agency's own wording
Body	16 to 17 px	400	Line height 1.6 for Devanagari
Label, source, time	13 to 14 px	500 to 600	Slate

Rules

- Nepali comes first wherever both languages appear.
- Numerals follow the language: ०१२३ in Nepali, 0123 in English.
- Give Devanagari more line height than Latin, so the top line and the matras do not collide.
- Do not letter-space Devanagari. Spaced capitals are only for short Latin labels such as “GATI” in the logo.
- No italics for Devanagari. Use weight for emphasis.

Voice and writing

Gati sounds like a calm, careful neighbour who has read the official notice and is telling you exactly what it says.

- Nepali first. Address the reader respectfully (हजुर).
- Short sentences and plain words. No alarming or sensational wording.
- Every item carries its source and the source time.
- Do not reword an official notice. When summarising, label it as a summary.
- Never add together figures from different agencies.
- Show the trust label (Official, Verified, Reported) and the severity separately, always.
- Say plainly what Gati does not know, and when information is old.

Examples

WRITE	NOT
DHM's warning, relayed by Gati	Gati warns of floods
स्रोत: जल तथा मौसम विज्ञान विभाग, बिहान ६:३०	ताजा खबर!
Summary, not word for word	(an unlabelled rewrite)
Model, not a warning	Rain alert for the next 3 hours
Featured in GitHub Octoverse 2026	Award-winning, GitHub-backed

Design language in brief

- **Quiet until it matters.** Neutral pages, so that a severity colour is always noticed.
- **Source and time on everything.** No alert, number or map layer appears without them.
- **Works on a weak phone and a weak signal.** Plain pages, small files, usable offline.
- **Never by colour alone.** Severity is a word, an icon and a colour together.
- **Rounded, not playful.** Corner radius 10 to 14 px on cards, full pills for labels, no drop shadows on the logo.

Icons and social media

App icon

Maskable / full bleed

Profile picture

Navy alternative

Profile pictures are full-bleed Gati Red with the white glyph kept inside the circle that every platform crops to. Theme colour `#0B1424`; app launch background `#F7F9FB`.

Sizes in the kit

USE	SIZE (PX)	FILE
X header	1500 × 500	covers/x-header
LinkedIn page cover	1128 × 191	covers/linkedin-page-cover
LinkedIn profile banner	1584 × 396	covers/linkedin-profile-banner
Facebook cover	1640 × 624	covers/facebook-cover
YouTube banner	2560 × 1440	covers/youtube-banner
GitHub social preview	1280 × 640	covers/github-social-preview
Telegram / Viber cover	1280 × 720	covers/telegram-viber-cover
Link share image	1200 × 630	covers/share-cover
YouTube thumbnail	1280 × 720	thumbnails/youtube-thumbnail
Square and portrait post	1080 × 1080, 1080 × 1350	posts/post-square, post-portrait
Story, Reel, TikTok	1080 × 1920	posts/story
Profile pictures	400 to 1080	profile/ (one per platform)

Banners keep the logo and tagline inside each platform's safe area, so they survive cropping on phones.

Do and don't

✓ Do

- Use the logo unchanged in news, articles and talks about Gati.
- When showing a Gati alert, also show the original agency's name and link.
- Link to the Gati site or to the specific alert.
- Use the white logo on dark backgrounds and the standard logo on light ones.

✕ Don't

- Recolour, stretch, rotate, or add shadows or effects to the logo.
- Combine it with a government emblem or agency logo, or present Gati as official.
- Suggest that Gati endorses or sponsors anyone.
- Use the Gati name and logo on a fork or another service; use your own.
- Place the logo over photos or busy backgrounds.

✕ Stretched

✕ Recoloured

✕ Rotated

✕ Shadow or effect

Licence

Gati's code (MIT) and content (CC BY 4.0) are openly licensed, but the name and logo identify this project and are not covered by those licences. “Gati” is a working name pending a trademark check.
